# CAMP ASIA 2019

*exclusively at International School Saigon Pearl*

Together with Camp Asia - a part of Cognita Schools Group, we are delighted to introduce the Summer Camp program for all children from **18 months - 11 years of age**.

Our four-week (20 days) camp is divided into weekly themes. Each theme stands alone as a unique project-based learning experience. Students will interact with the weekly theme through a fun mix of sports, team-building activities, outdoor games, art classes and weekly projects. The goal of each weekly theme is to expose students to unique learning opportunities. These individual learning experiences will help guide students on their larger journey as lifelong learners.

## Learn By Exploring

*Learning activities are integrated through Language Arts, Math, Science and Social Studies.*

**Week 1: Working Towards Sustainability:** The climate is changing and we need some positive re-arranging! Let's kick off this summer camp with a Sustainability Mindset. Let's explore and learn what it would take to conserve energy, save water, reduce/reuse/recycle, smart shopping, produce sustainable food, and manage our waste to maintain our planet Earth for the future generations.

**Week 2: Let's Get Tinkering:** Do you dismantle your new toy or video game to see how it works? Do you try different ways to put broken parts and loose parts together? Foster your natural curiosity, experimentation and imagination through tinkering. This week, you will be engaged in various tinkering activities that support team work, collaboration and building social relationships.

**Week 3: Eager Entrepreneurs:** This week, let's work in teams and come up with a business idea (service or product). We will begin with a business plan, budget and marketing strategy and end with a business fair. This is a simple and exciting learning engagement to make sure your children are getting some communication, language and writing and math practice while collaborating, researching and interacting.

**Week 4: More Than Meets the Eye:** Don't disregard simple objects-there is more to them that meets the eye. Throughout this week, you'll be challenged to think about ways of transforming simple items into a machine or an important tool. Days will be packed with fun, hands-on activities designed to get you thinking, questioning, and creating.
